6.1	382	1,3,5,7,9,11,13,15,17,19,21,23,25,27,29,31
6.2	392	1,3,5,7,9,11,13,15,17,19,21,23,27,29
6.3	400	1,3,5,7,9,11,13,15,17,19,21
6.4*	407	1,3,5,7,9,11,13
6.5*	416	1,3,5,7,9,11,13,15,17
6.6@	425	1,3,5,7,9
7.1*	454	1,3,5,7,9,11,13,15,17,19,23,25,29
7.2*	462	1,3,5,7,9,11,13,19,21
7.3*	465	1,3,5,9

*optional @applications

MATH260 is a linear algebra (sometimes called matrix theory) course. Topic include systems of linear equations, row reduction, applications of linear systems, vectors in 3-space, linear independence, linear transformation, matrix operations, computer graphics@, determinants*, vector spaces , null space, column and row space, basis, eigenvectors, eigenvalues, diagonalization, complex eigenvalues*, inner product, length, orthogonality and orthogonal projections, Gram-Schmidt process*, least-squares problems*, and quadratic forms*.
